

Assignment 5 - Phone & Tablet
Due April 10

Objectives

Build an single app that runs on a phone and a tablet.

App description

We will use part of assignment 4 for this assignment. In this assignment you do not need to take photos, post reports or display maps. The app needs to display the list of existing reports and display the detailed view. On a phone the list will be one screen. When one selects an item from the list one then goes to the detailed view of that item. On a tablet the list of existing reports and the detailed view will be shown on the screen at the same time. The app uses the same code base for phone and the tablet.

Grading

The assignment will be graded as follows:

Points	Item
20	Network connections
10	List of Reports sorted by date, most recent on top, display all users reports
10	Detailed view of a report
30	Uses two separate views on a phone
30	Two views (List and detailed) appear side by side on tablet

What to Turn in

After removing the build directories in your project zip up your entire project and submit it on-line in the course portal. We will use the course portal (<http://bismarck.sdsu.edu/CoursePortal>).
